

Core specification and pricing for interactive whiteboard installations

Core package

Details Package price

Delivery of equipment to the school.

64" SmartBoard SB660 interactive whiteboard.

A 2000 ANSI lumens minimum multimedia projector as a minimum spec.

Wall-Mounted Satellite Speakers.

Projector Ceiling Mounted with VGA, RCA and *network points fitted next to the board (to enable connection of laptops, DVD/VCR).

Installation of software to one specified computer/laptop.

A basic introductory operational training session covering connection of hardware.

Telephone and email support.

3-year on-site warranty for all the above. (3 years swap-out warranty for Projector and 5 years for the board).

Where possible existing power supply points are utilised but if necessary we can arrange for additional ones to be installed by an approved electrical contractor at an additional cost to the school.

We can normally secure a good discount for bulk purchases from our suppliers.

Existing network points already in a class can usually be used, our price does not include a new network lead being installed from the school comms room or patch cabinet to the class, although this can be arranged.

£2160.00 +VAT

*NB. Prices are subject to a site survey carried out by ourselves and a County approved builder.

Additional options

Details Price

Upgrade to 77" SmartBoard SB680 interactive whiteboard £2450.00 + VAT.
